

Lighthouse® Linden - New For 2026!

Tilia x flavescens 'Jefhouse'

Height: 40 feet

Spread: 30 feet

Sunlight: ○

Hardiness Zone: 3a

Description:

An impressive small shade tree with a narrow pyramid shape and strong central trunk; features fragrant yellow flowers in early summer when few trees bloom; very tidy and low maintenance; very adaptable, making an excellent lawn or street tree

Ornamental Features

Lighthouse Linden is primarily valued in the landscape for its distinctively pyramidal habit of growth. It features subtle clusters of fragrant buttery yellow flowers with tan bracts hanging below the branches in early summer. It has dark green deciduous foliage. The heart-shaped leaves turn outstanding shades of gold and yellow in the fall.

Landscape Attributes

Lighthouse Linden is a dense deciduous tree with a strong central leader and a distinctive and refined pyramidal form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance tree, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects

Lighthouse Linden is recommended for the following landscape applications;

- Accent
- Shade

Planting & Growing

Lighthouse Linden will grow to be about 40 feet tall at maturity, with a spread of 30 feet. It has a low canopy with a typical clearance of 3 feet from the ground, and should not be planted underneath power lines. It grows at a fast rate, and under ideal conditions can be expected to live for 70 years or more.

This tree should only be grown in full sunlight. It is very adaptable to both dry and moist locations, and should do just fine under average home landscape conditions. This plant does not require much in the way of fertilizing once established. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
